OBJECTIVE

I am seeking an innovative and challenging job, where I can always keep on learning new technologies and thus keep on evolving my career and knowledge. Currently looking **Full Stack Engineer Role** or **Automation Engineer Role (100% Permanent Remote / WFH)**.

CAREER SUMMARY

- ❖ 4.5 years' experience as an QA Engineer and Business Analyst in a Noida based ERP Startup.
- ❖ 8 months experience as an Automation Engineer in Designoweb Technologies / Recro.

STRENGTHS

- ❖ Adaptive and innovative personnel with highly analytical and technical nature.
- ❖ Keen eye to the details.
- ❖ Ability to work under pressure.
- ❖ Quick learner.
- ❖ A dedicated and hard-working person, committed with always learning attitude.

EDUCATIONAL QUALIFICATIONS

- ❖ Bachelor of Computer Applications from IEC University (2018 – 2021).
 - ❖ CBSE 12th in PCM from Bharti Public School, Swasthya Vihar (90%, 2015 - 2016).
 - ❖ CBSE 10th from Bharti Public School, Swasthya Vihar (9.4 CGPA, 2013 – 2014).
-

EMPLOYMENT SCAN

July 2018 – Feb 2023: Eshishyamaam Guru Pvt Ltd

- ❖ Started working as an Intern in a Noida based **ERP solution** which provided services to schools. Gradually reached the position of **QA Engineer**. Here I was responsible for testing and maintaining the product.
- ❖ Handled a team of 5 resources, for further resolution of day-to-day problems faced by teachers and parents in the ERP. **Gave trainings and provided support** to non-technical and support team, as well as teachers for efficient usage of the product.
- ❖ Thoroughly testing the entire ERP product end-to-end on both web and mobile platform. Expertise in **black box, white box, functional, regression, integration, smoke, sanity, cross-browser and cross-platform testing methodologies**. Extensive testing done on the following ERP modules – **Staff, Student, Attendance, Notification, Exam and Result, Assessment, Task and Reminder, Feedback, Fee, Report** and so on. Tests ranging from **minor sanity checks** to **major direct and indirect dependencies** between logically related modules.
- ❖ Creating **test cases, doing regression and boundary testing** of product module wise, and documenting the findings and recordings in **Jira** and **Gitlab**. Keeping day-to-day communication with the development team for **closure of bugs on priority basis**.
- ❖ Responsible for handling critical deliverables like **timely delivery of Results and Assessments** to all the classes, **implementation of payment gateway** for fee collection and so on.
- ❖ **Worked with a product owner mindset** and kept an open communication with all the stakeholders for **constant betterment of the product and overall UX**, suggesting important additions like inclusion of soft delete feature in fee module, filtering of attendance status date wise, and so on.

Mar 2023 – Oct 2023: Designoweb Techonologies / Recro (IIIrd party FinTech Client)

- ❖ Started working as part of **DFX team** first with the core product, gradually was given the **responsibility as SPOC** for one of the major implementations of the product (**Kotak Baas**).
 - ❖ In-depth exposure of **SDLC/STLC** and other working procedures in a **medium sized agile corporate**.
 - ❖ Experience in creating **complex automation test suites** comprising of **E2E** implementation of major functionalities of the product, such as **invoice processing, limit node processing, via SFTP Server**. Technologies used – **Selenium, Java** and other dependencies like **JCraft (Jsch), Apache POI** and so on.
 - ❖ Experience working with **Fireflink Automation Tool**. Responsible for writing **custom NLPs** in Java, for the scenarios **which can't be automated directly via Fireflink** (such as **async SFTP File transactions**). Strong understanding of **Java**.
 - ❖ Experience working with **AWS, Linux Administration** and **CI/CD** in general.
 - ❖ Responsible for providing **UAT/Production support** to product team, thereby reducing the turnaround time.
 - ❖ Experience working with **Relational Databases** and writing complex queries for solving day-to-day business challenges.
 - ❖ Received **special recognition from VP of engineering** for work and **exemplary contribution in team**.
 - ❖ Apart from all this a **self-taught full stack engineer**, having hands on experience in working with **MERN Stack**. Experience of **frontend development** in **React, Typescript, Redux** with other contemporary technologies like **Tailwind CSS, Bootstrap, Styled Components** and so on.
 - ❖ Experience of **backend development** in **Node JS** and **Java (Spring Boot microservice architecture)**. Implementing **CRUD** functionality with **MVC design pattern** and **clean code architecture**.
 - ❖ Experience of writing **unit** and **functional tests** using **Jest, Mocha, Chai, Cypress, Junit**.
-
